

Root Pruning Notes

Treatment of roots exposed during construction: for roots over 1" in diameter damaged during construction; make a clean, straight cut to remove damaged portion of root. All exposed roots shall be temporarily covered with damp burlap to prevent drying, and covered with soil as soon as possible. All pruning to be done to ANSI A300 standards. Consult certified arborist regarding thinning of foliar canopy. Root pruning should not be performed within five months of local high-wind season.
