WASHINGTON

# Streets and Infrastructure Update

## Washington and 11th Project

- Design completed at end of 2022. Through design and public input process, project was expanded to provide additional infrastructure improvements to lower/residential Washington Ave south of 11th Street based on public feedback received.
- Nearly \$6 million awarded in federal and state funds accounting for nearly 75% of overall expected project cost
- Improvements will advance non-motorized transportation facilities/safety while improving traffic operations at west end of Manette Bridge with construction of roundabout
- Construction expected to begin in Spring 2023 and planned to be substantially completed by end of 2023
- Construction of project to take place in multiple phases to help minimize impacts to traffic and adjacent properties

# Streets and Infrastructure Update

## Pine Road Basin Flooding Mitigation Project

- Contractor has completed all in-water work on Stephenson Creek. We have a new outfall just south of intersection of Sheridan Road and Robin Avenue, and a new intake structure at the trailhead off of Stephenson Drive
- Contractor is currently installing new storm main across from Church of the Nazarene property. Once out on the street at E. 29th Street and Robin Avenue, they will turn and head north building improvements along Robin Avenue
- Robin Avenue improvements expected to be completed by late winter/early spring. After completion, they will start making improvements up Eagle Avenue.

# Streets and Infrastructure Update

## Pump Station 14 Relocation

- The City will be replacing existing water Pump Station 14, which was constructed in the 1940s. Former site of Pump Station 14 was next to Schley Canyon.
- New pump station site is located below the YMCA facility, next to Bremerton Ice Arena. A public restroom is included as part of the new station for use by the public, which will be accessible from Wheaton Way
- Construction cost is \$2.7 million and is expected to start in early April 2023
