2024 COMPREHENSIVE PLAN UPDATE

October 2024

## **What is the Comprehensive Plan?**

This Comprehensive Plan is the umbrella policy document that guides virtually all decisions made by City government and, in many cases, by local organizations and individual citizens. It seeks to assure that each community decision, expenditure, and action is consistent with our shared visions, values and goals.

**Jeff Coughlin**  
District #3 Representative

## **Comprehensive Plan Update 2024**

Our Comprehensive Plan is a 20-year vision and roadmap for Bremerton’s future. Our plan guides City decisions on where to build new jobs and homes, how to improve our transportation system, and where to make capital investments such as utilities, sidewalks, and public facilities. Our Comprehensive Plan is the framework for most of Bremerton’s big-picture decisions on how to grow while preserving and improving our neighborhoods.

Our Comprehensive Plan meets the requirements of the Washington State Growth Management Act (GMA) by helping protect our environment, quality of life, and economic development. Our plan must be consistent with both the multi-county planning policies in Puget Sound Regional Council’s (PRSC) Vision 2050 and Kitsap County’s Countywide Planning Policies.

Many communities amend their comprehensive plan annually and regularly adopt changes to the development regulations that implement them. In addition to these regular amendments, the state GMA requires cities and counties to update comprehensive plans every seven years; however legislation approved an extension due to the economic recession. In the City of Bremerton’s case, an updated plan must be approved by December 31, 2024 to comply with State GMA (RCW 36.70A.130(5)).

## Now We Know Why, What's Next?

As the City embarks on the update to the Comprehensive Plan, we are encouraging everyone to consider current Comprehensive Plan goals and policies and where you see Bremerton in 20 years—do the policies and your vision match? The following pages summarize the current plan and trends. When you're considering this information, keep the following questions in mind:

1

**What makes Bremerton a special place?**

2

**What makes people want to become part of this community?**

3

**What attracts new vigor and activity to Bremerton?**

4

**What are the qualities that make Bremerton unique in the world and special to its citizens, both old and new?**

5

**What changes would you make to the Plan to make it match with your response to the questions above?**

## District Overview

### DEMOGRAPHICS

General population and demographic information for District 3 are shown below.

Population of Two or More Races, 12%

Other, 4%

Native Hawaiian and Other Pacific Islander, 1%

Asian, 5%

American Indian and Alaska Native, 1%

Black or African American, 5%

Source: 2020 Decennial Census

# District Overview (continued)

## Recreation

District 3 contains many outstanding City parks and a branch of the Kitsap Regional Library. Residents in this district have ample access to the shoreline and participation in community events Downtown and in Manette. New sidewalks give this residential area excellent walkability, as well as direct access to the Bridge-to-Bridge Urban Trail.

### DISTRICT PARKS

Bachmann Park	Lower Roto Vista Park
Evergreen Rotary Park	Manette Park
Harborside Fountain Park	Smith Nature Play Park
Kitsap 911 Memorial	Whitey Domstad Park
Louis Mentor Boardwalk	

Bachmann Park, located on Bremerton shoreline in Manette

Evergreen Rotary Park

Public Art, Art Wall

Manette Park

Harborside Fountain Park

## DISTRICT ASSETS

### Bremerton's Metropolitan Regional Growth Center

### Vibrant neighborhood-scale commercial district in Manette

### Good transportation assets, including connections to Seattle

Support a variety of Active Transportation projects, including visual and physical connections from neighborhoods to the shoreline

## Vision Board

What items would you like to be considered within your district with the Comprehensive Plan Update?

Send a comment to [compplan@ci.bremerton.wa.us](mailto:compplan@ci.bremerton.wa.us)

Items identified for evaluation thus far are shown below.

Support economic growth of the Downtown Regional Center

# Permit Statistics

District 3 saw a spike in the valuation of permits beginning in 2019 and continuing into 2020. The District had the third highest number of permits and third highest valuation of permits out of the seven districts, but it was the only district where more non-residential than residential permits were issued.

**199**

SECTION 2

# Current Comprehensive Plan (2016)

# Current Comprehensive Plan (2016)

Within District 3, seven designations have been identified by the 2016 Comprehensive Plan as outlined in this section. In conjunction with this Comprehensive Plan update, this could be revised.

## LOW DENSITY RESIDENTIAL (LDR)

<b>Purpose/ Intent</b>	To create new and support existing single-family neighborhoods.
<b>Location</b>	Residential neighborhoods located throughout the city as mapped.
<b>Land Uses</b>	Single-family residential homes, duplexes and townhouses, and low intensity compatible uses such as churches, schools, senior housing, and parks. Accessory dwelling units are encouraged.
<b>Intensity/ Density</b>	5 to 10 dwelling units per acre Three stories and conditionally allowed uses may be four stories
<b>Character</b>	The City's residential neighborhoods are characterized by single-family homes on traditional urban lots. There are some existing small-scale commercial structures with LDR, which should be encouraged to be redeveloped by adaptive reuses to provide services to the neighborhood.

## HIGH DENSITY RESIDENTIAL (HDR)

<b>Purpose/ Intent</b>	To provide a high standard of development for residential multifamily type structures and to provide a variety of housing options for a wide diversity of people. This designation should be limited to those neighborhoods that are currently developed with multifamily housing.
<b>Location</b>	Neighborhoods that consist primarily of multifamily type structures as mapped
<b>Land Uses</b>	Residential uses of multifamily dwelling units, townhomes, duplexes, and single family (attached or detached). Supporting residential uses, such as schools, parks and churches, and nursing homes/ senior complexes should be allowed within this designation.
<b>Intensity/ Density</b>	40 units per acre Three stories and supporting residential uses could be up to five stories
<b>Character</b>	This designation is for areas that generally have an existing intense level of development and includes properties that are primarily multifamily development, such as condominiums, apartments, and senior housing complex/nursing homes. Most structures are one to three story multifamily structures.

# Current Comprehensive Plan (2016)

Within District 3, seven designations have been identified by the 2016 Comprehensive Plan as outlined in this section. In conjunction with this Comprehensive Plan update, this could be revised.

## MEDIUM DENSITY RESIDENTIAL (MDR)

<b>Purpose/ Intent</b>	To create a designation that recognizes the existing built environment of medium density-type development and encourages redevelopment opportunities. This designation will be for neighborhoods which are primarily developed with duplexes and similar uses.
<b>Location</b>	Neighborhoods that consist primarily of duplex type structures as mapped.
<b>Land Uses</b>	Single-family dwelling units (attached or detached), duplexes, and townhomes. Low intensity compatible uses such as churches, schools, senior housing, and parks.
<b>Intensity/ Density</b>	18 dwelling units per acre Three to four stories
<b>Character</b>	The designation consists of neighborhoods that are currently developed predominantly with duplexes. As many of these duplexes were constructed from the World War II boom, much of this area could benefit from redevelopment. By outrightly allowing duplexes, single-family homes, and townhouses, this area may be able to be revitalized and continue to provide a wide variety of housing types.

## NEIGHBORHOOD BUSINESS (NB)

<b>Purpose/ Intent</b>	The intent is to provide for small-scale business districts that reflect the scale and character of surrounding neighborhoods. Mixed-use development with residential above the commercial space will be encouraged within this designation.
<b>Location</b>	Neighborhood Business should be only placed in areas that have existing small scale commercial development.
<b>Land Uses</b>	Commercial and mixed-use residential
<b>Intensity/ Density</b>	15 units per acre, but also must be accessory to an allowed commercial use Three to four stories
<b>Character</b>	Small-scale commercial or mixed-use nodes with uses such as grocers in converted residential.

## HIGHER EDUCATION (HE)

<b>Purpose/ Intent</b>	The Higher Education designation recognizes the Olympic College (OC) campus and supporting uses. The designation provides for growth at the OC campus, but promotes growth that is compatible with the surrounding neighborhoods and other nearby areas.
<b>Location</b>	In the vicinity of Olympic College, in West Bremerton near Warren Avenue Bridge
<b>Land Uses</b>	Educational facilities, residential (including dormitories), and open spaces (such as parks).
<b>Intensity/ Density</b>	20 units per acre Four to six stories
<b>Character</b>	This designation recognizes public collegiate campuses and the uses that may need to be developed to support the campus.

# Current Comprehensive Plan (2016)

Within District 3, seven designations have been identified by the 2016 Comprehensive Plan as outlined in this section. In conjunction with this Comprehensive Plan update, this could be revised.

## City Centers

### 📍 DOWNTOWN REGIONAL CENTER (DRC)

#### General development parameters

<b>Density</b>	40 units per acre (requires future review)
<b>Height</b>	(Consistent with current zoning heights for downtown, details to be added)  Structure Type: Various, single use residential and commercial, and/or mixed-use structures
<b>Character</b>	The Downtown Regional Center offers well-integrated employment, shopping and residential opportunities as part of larger urban core. A primary goal is to provide an active street life.
<b>Location</b>	Downtown area
<b>Policy Direction</b>	Create and revitalize the downtown as the premier urban center of the West Sound region, providing jobs, residential opportunities, and cultural and economic activities.
<b>Discussion</b>	The Downtown Regional Center is the core area of the City of Bremerton. At the heart of the larger downtown, the DRC offers a mix of opportunities to live and work in a vibrant, well-designed environment. The DRC designation focuses on providing residential or office uses on upper floors, with retail uses at the street level to energize the urban experience. Parking should be underground or in structures, not in surface lots. Street trees, well-designed public gathering areas, and lighting should be employed to create a safe, inviting experience at the street level—day and night.

# Current Comprehensive Plan (2016)

Within District 3, seven designations have been identified by the 2016 Comprehensive Plan below. In conjunction with this Comprehensive Plan update, this could be revised.

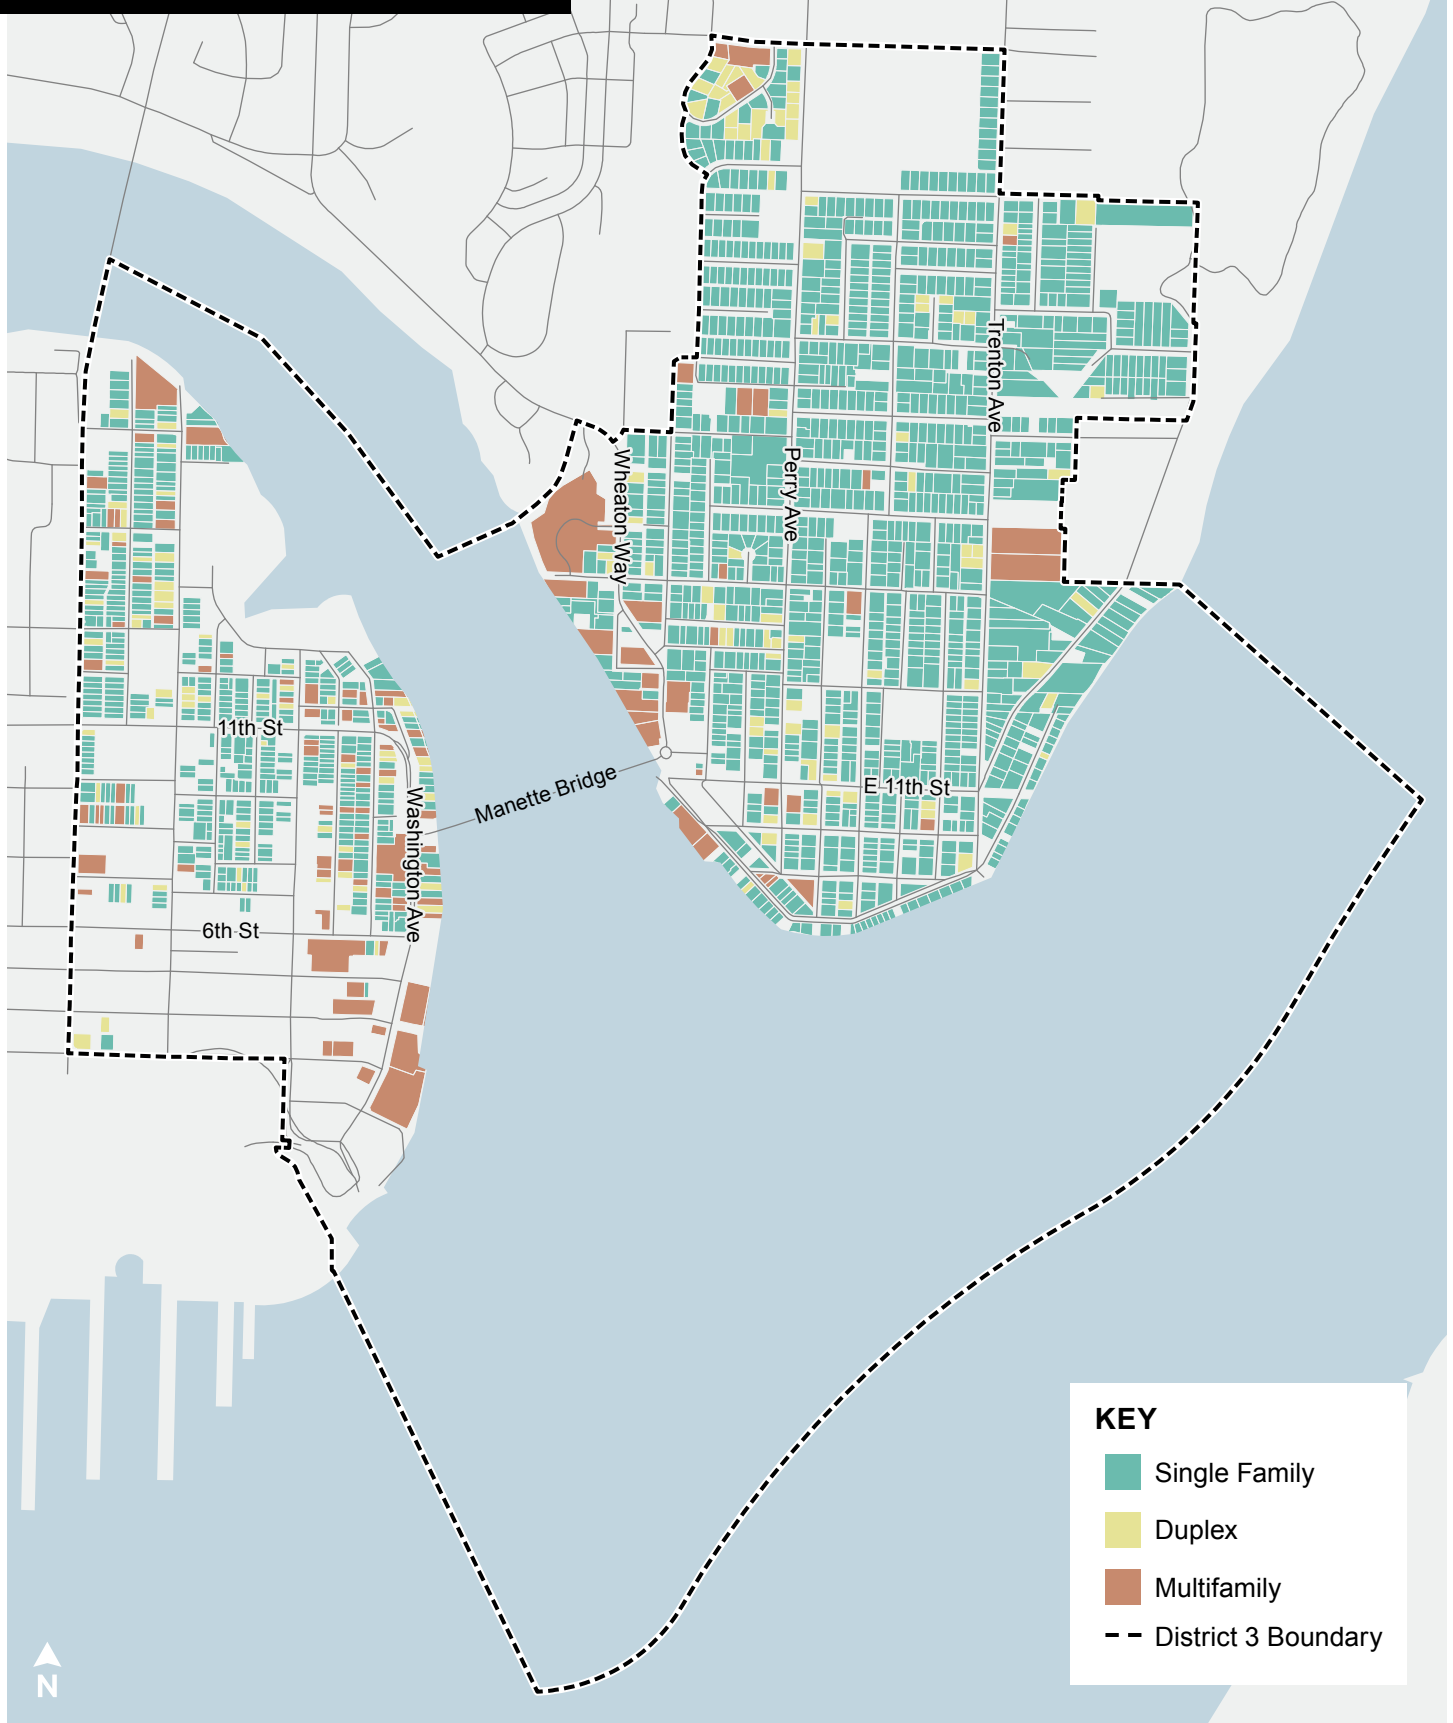

## City Centers

### 📍 MANETTE NEIGHBORHOOD CENTER (MNC)

<b>Intent</b>	A small-scale commercial designation that serves surrounding residential areas.
<b>Character &amp; Location</b>	The scale and design characteristics of this center will respect the existing character and built environment. This unique neighborhood center will have a small commercial/mixed-use district surrounded by single-family and multifamily residential neighborhoods which enjoy spectacular views to the Narrows, Sinclair Inlet, Downtown Bremerton and other points. In the Center Core, along 11th Street and vicinity, residential uses above traditional sidewalk-facing storefronts will be encouraged.
<b>Land Uses</b>	Mixed-use, commercial and residential.
<b>Intensity/Density</b>	10 to 15 units per acre, dependent on the designation. Three or four stories

SECTION 3

# Active Transportation Plan

# Active Transportation Plan

Active transportation describes human scaled and often person-powered ways of getting around, such as walking, bicycling or rolling a wheelchair. The Active Transportation Plan provides a foundation for policies, procedures, investments, and improvements to the City of Bremerton active transportation system.

**Goals include increased use of active transportation modes, such as walking, biking and to improve safety and mobility for all users.**

**Benefits of active transportation include reducing traffic congestion, improving access to economic opportunity, reduce greenhouse gases, increase in physical activity and improving human health.**

**Provides connectivity to support local travel around the city to key destinations**

At the right you will find examples of Active Transportation Projects in your district.

Look for Active Transportation Plan updates at [Bremerton2044.com](https://www.bremerton2044.com), and email any comments you may have to: [commplan@ci.bremerton.wa.us](mailto:commplan@ci.bremerton.wa.us).

SECTION 4

# 2024 Comprehensive Plan Update

# Housing Considerations

## Centers

Per the Kitsap Regional Coordinating Council (KRCC), *“Growth in Centers has significant regional benefits, including supporting multi-modal transportation options, compact growth, and housing choices near jobs, climate goals, and access to opportunity. As important focal points for investment and development, Centers represent a crucial opportunity to support equitable access to affordable housing, services, health, quality transit service, and employment, as well as to build on the community assets currently present within centers.”* The Downtown Regional Center is the only area within the city identified for a notable density increase with the Comprehensive Plan update, this approach is consistent with citizen feedback received during EIS Scoping and regional planning requirements from PSRC and KRCC.

**Locating high-density in Downtown keeps housing within walking distance of the city’s largest employer, within proximity to the most developed mass transit hub in the city, and preserves the remainder of Bremerton from more intense development patterns.**

# Housing Considerations

## High-Capacity Transit

In the 2022 Kitsap Transit Long-Range Transit Plan, our local transit authority identifies High-Capacity Transit (HCT) stations will be located along the highway 303 corridor at yet to be determined locations. HCT means that a bus would arrive every 15 minutes at HCT stations. To ensure this investment in transit is best utilized, regional planning commitments require the City to provide development standards conducive to high-density in areas surrounding HCT stations. That includes areas within a ½-mile radius of the Downtown ferry terminal property, and within a ¼-mile of HCT stations; this area encompasses the vast majority of Downtown. Other proposed development standard increases are largely planned along existing transportation corridors within existing commercial and high-density areas.

Visit the Kitsap Transit website to learn about HCT and other transit improvements planned for Bremerton in the next 20 years.

Scan or [click](#) to visit the Kitsap Transit Long Range Transit Plan

## Environment

Concentrating density increases in Downtown, and increasing development conditions along transit and transportation corridors, promotes a walkable, bikeable community that doesn't require a single-occupancy vehicle to get to work, the store, or to recreate. Permitting multifamily structures in all residential zones throughout the city also contributes to meeting climate goals. As multifamily housing shares walls with other units, and is a more compact development type than single-family homes, it is inherently more environmentally beneficial. On average, a single-family home generates 42% more vehicle trips than an apartment unit. While single-family homes would continue to be a permitted use, allowing multifamily construction is integral in meeting City climate goals. Proposed density increases in Downtown, and development standard alterations along transportation corridors, ensure reduced vehicle miles traveled (VMT) by locating housing adjacent walkable/bikeable areas and transit.

# Housing Considerations

11-unit apartment, 7,164 square feet, Bremerton, WA

Single family home, 7,829 square feet, Bellevue, WA

## Social Equity

The U.S. Census Bureau estimates that 46.6% of Bremerton residents own their homes. Promoting land use strategies that prohibit multifamily development likely results in artificially raising rental costs for the majority of the population due to limiting multifamily rental housing to select areas of the City. This has a disproportionate impact on people of color. Per a 2022 Harvard University Study, *“Single-family only zoning and other density restrictions block the development of multifamily housing in many communities, thereby excluding renter households from those neighborhoods. Given that people of color are more likely to have lower incomes and to rent rather than own their homes, the geographic concentration of rental housing helps to perpetuate patterns of racial and socioeconomic segregation.”* No density increases are proposed in LDR and MDR designations; however, multifamily housing types are a proposed use in these zones. This means that if your lot is large enough to construct five single-family homes, the option should be available to instead construct one structure containing five residential units. For example, the image to the right illustrates two structures, one is a 7,000+ square foot apartment with 11 dwellings, and the second structure is a 7,000+ square foot single-family home. Today’s code would allow the large single-family home to be built on a lot of any size, however, the apartment is a prohibited use even though density criteria would require it to be cited on a lot greater than an acre in size in the LDR zone.

## Homelessness

It may sound like an oversimplification, but areas with more available housing experience less severe levels of homelessness. The short video linked below (about 8 minutes) offers an analysis to the root cause of homelessness and identifies difficult housing regulations as a barrier perpetuating homelessness. A 2023 Housing Underproduction in the U.S. report ranked the Bremerton-Silverdale-Port Orchard region 107th in the country for the underproduction of housing.

Scan or [click](#) to learn more about the root causes of homelessness

# Housing Considerations

## State Requirements

The Department of Commerce forecasts that the State will need more than a million new homes to be constructed in the next 20 years. Accordingly, the State of Washington has implemented a number of measures over the last few years aimed at promoting increased housing production, particularly *Missing Middle Housing*. “Missing Middle Housing” is typically more affordable to consumers, and is compatible in scale, form, and character with single-family houses. This includes housing types like duplexes, townhomes, stacked flats, small apartment buildings, and cottage housing. The City already permits many of these housing types. HB 1220 requires the City to allow for housing types that meet the needs of all income levels within our jurisdiction. HB 1337 further eases restrictions on Accessory Dwelling Units (ADUs) in the State. The Comprehensive Plan will need to demonstrate compliance with State statute, which will later be incorporated into our local regulations.

**HB 1110** requires that the City allow Missing Middle housing types. These provisions do not apply to commercial or mixed-use zones, and include development incentives to construct Middle Housing related to parking, density, and subdivision.

## PARKING

The City cannot require more than one off-street parking space per residential unit on lots smaller than 6,000 square feet before any zero lot line subdivisions or lot splits, or more than two off-street parking spaces per residential unit on lots greater than 6,000 square feet.

## DENSITY

The City must permit a minimum of two residential units of Middle Housing types per lot. The City must allow four residential units per lot if either of the following criteria are met: 1) At least one residential unit meets affordable housing criteria, and/or 2) the lot is located within ¼-mile of a major transit stop. Currently, Bremerton does not have any qualifying transit stops, however, they are included in the Kitsap Transit Long-range Plan.

## SUBDIVISION

The City must allow separate sale of units and the land they sit upon. This includes subdivision of land into lots smaller than 1,000 square feet, if development standards such as maximum lot coverage, parking, and setback requirements are met.

## The Missing Middle

**DETACHED HOUSING**  
Single Family Homes

**MIDDLE HOUSING**  
Duplex, Triplex, Townhomes, Small Apartment Buildings, and Cottage Housing

**MID AND HIGH RISE HOUSING**  
Mid- and High-Rise Apartment and Condo Buildings

# Environmental Impact Statement (EIS) Preliminary Alternatives

**BREMERTON POPULATION AND JOB GROWTH  
2020–2044**

**43,505**  
2020 Estimated  
Population

**63,757**  
2044 Projected  
Population

---

**46%**  
Projected  
Population Growth

The 2024 Comprehensive Plan update is required by the Washington State Growth Management Act (GMA) in order to demonstrate that Bremerton has the capacity to absorb population and employment increases forecast to the year 2044. Population estimates indicate that the city will grow to 63,757 persons and 58,258 jobs by 2044. As the US Census Bureau estimates that Bremerton’s population was 43,505 with 44,083 jobs in 2020, this means that **the city is forecast to increase its population by over 46%**, with 32% increase in the number of jobs. The Comprehensive Plan must also be consistent with regional planning goals established in the Puget Sound Regional Council’s (PRSC) Vision 2050 and County level planning effort per the Kitsap Regional Coordinating Council (KRCC) Countywide Planning Policies.

The City initiated the Comprehensive Plan update process in the fall of 2022. At that time a postcard was mailed to every property owner and resident in the city, requesting feedback on where forecasted population and employment increases should be absorbed in the city. **Approximately 75% of all respondents indicated that population and employment increases should be located in existing Centers and commercial areas, while 25% responded that increases should be citywide**, and no respondents supported increasing density in the low density residential zone. Descriptions for each preliminary alternative are found on the following, followed by illustrative maps for each alternative later in the document.

# Environmental Impact Statement (EIS) Preliminary Alternatives

## Alternative #1

In the EIS process, a baseline of existing conditions is always established in order to gauge impacts proposed changes might make to the current system. Alternative #1 represents existing conditions with no proposed changes. As current zoning cannot accommodate forecasted population and job increases, Alternative #1 is not meant to represent a viable option to demonstrate conformance with State GMA requirements for the Comprehensive Plan update.

## Alternative #3

This alternative includes all proposed changes from Alternative #2 with no alterations within this Council District. Overall, Alternative #3 otherwise proposes citywide growth patterns counter to those adopted with the 2016 Comprehensive Plan and outside of existing Centers and commercial areas.

## Alternative #2

This alternative continues the Centers development method adopted by the City in 2004. There are two centers located in District 3: 1) Downtown Regional Center, and 2) Manette Neighborhood Center. The list below indicates specific zones where alterations are proposed:

### **LOW DENSITY RESIDENTIAL (LDR)**

- Add multifamily as a permitted housing type
- Allow four dwelling units per lot as required per HB 1110

### **MEDIUM DENSITY RESIDENTIAL (MDR)**

- Add multifamily as a permitted housing type
- Allow four dwelling units per lot as required per HB 1110
- Increase height from 35 to 45 feet

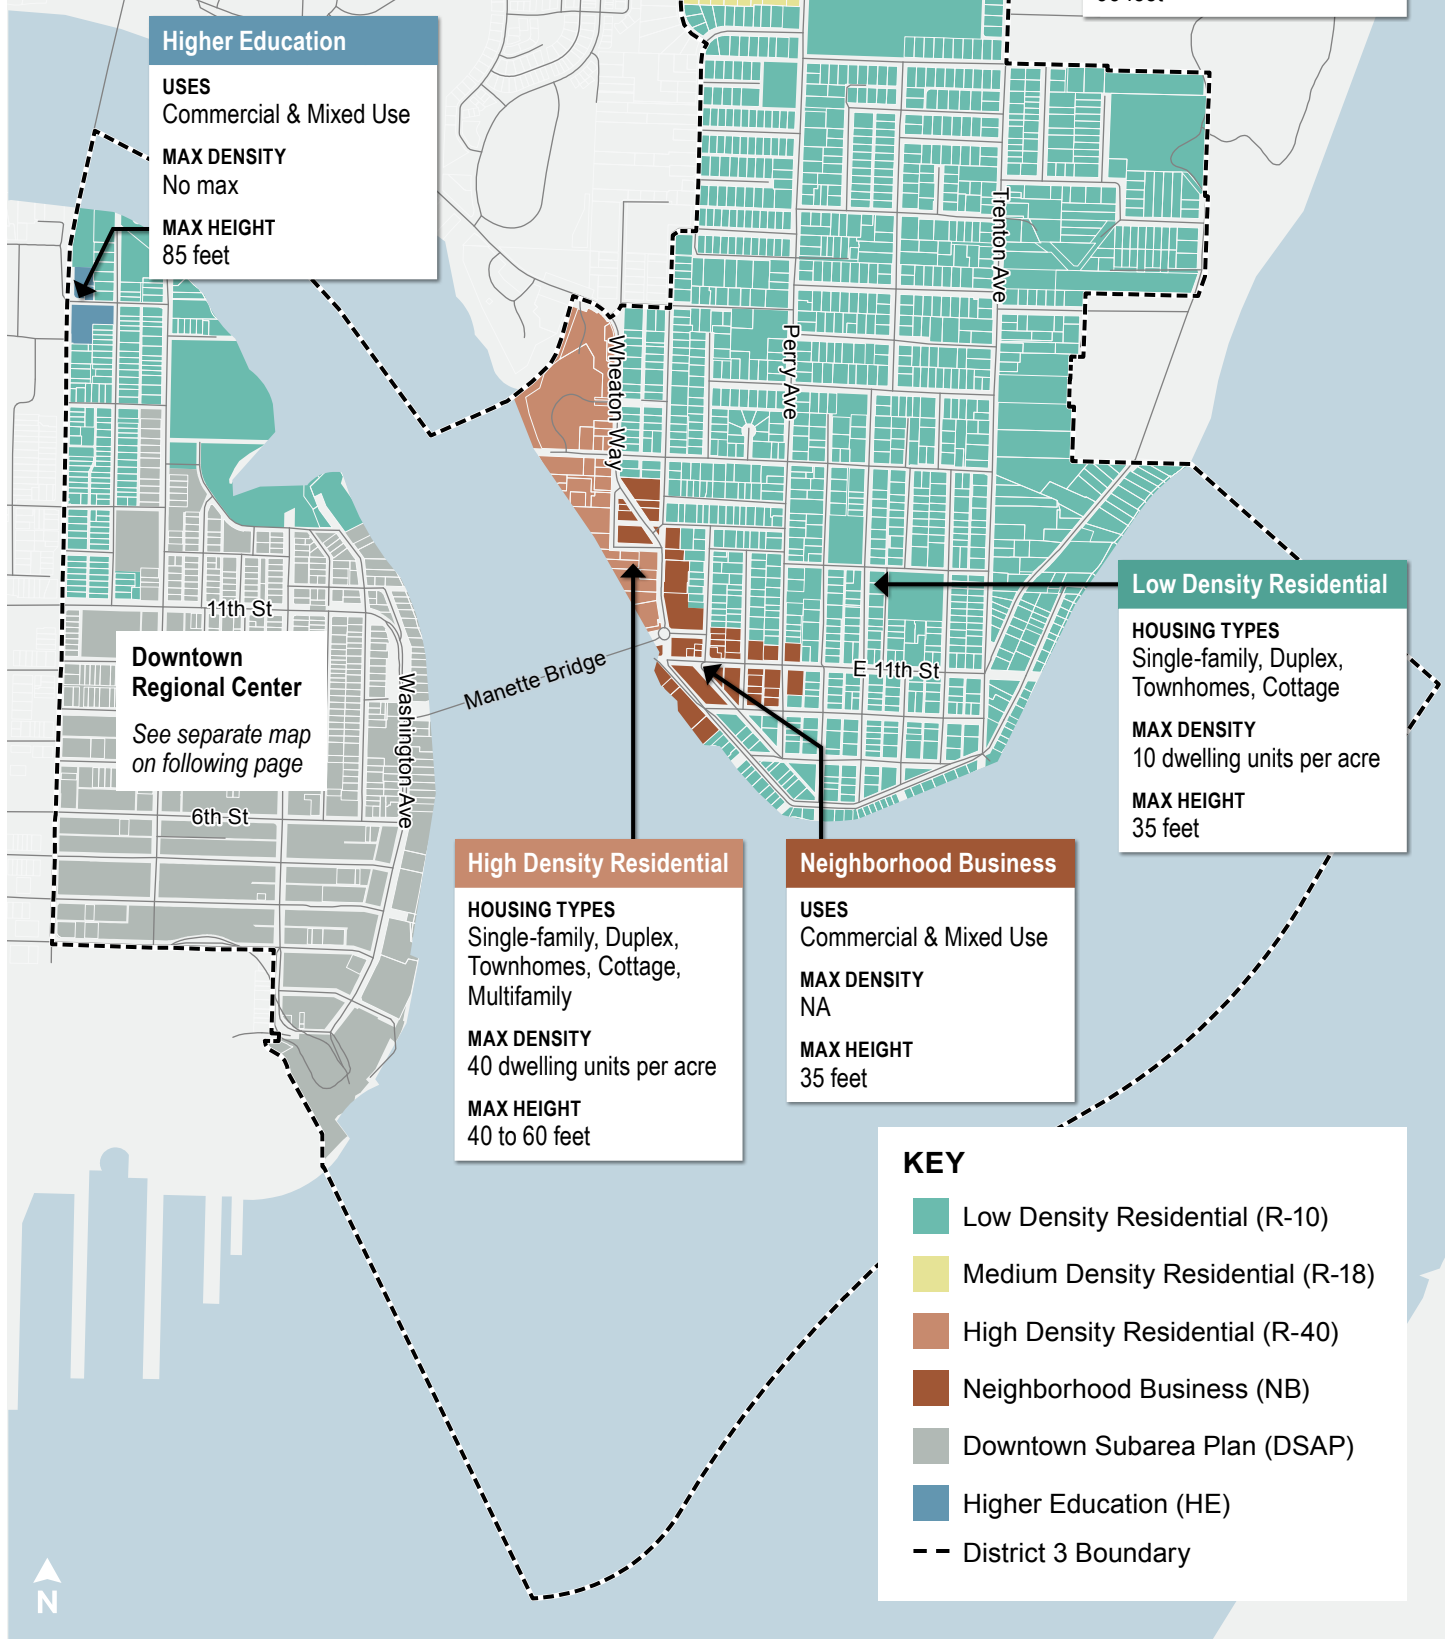

### **HIGH DENSITY RESIDENTIAL (HDR)**

- Increase height from conditionally permitted 60 feet to outright permitted 65 feet

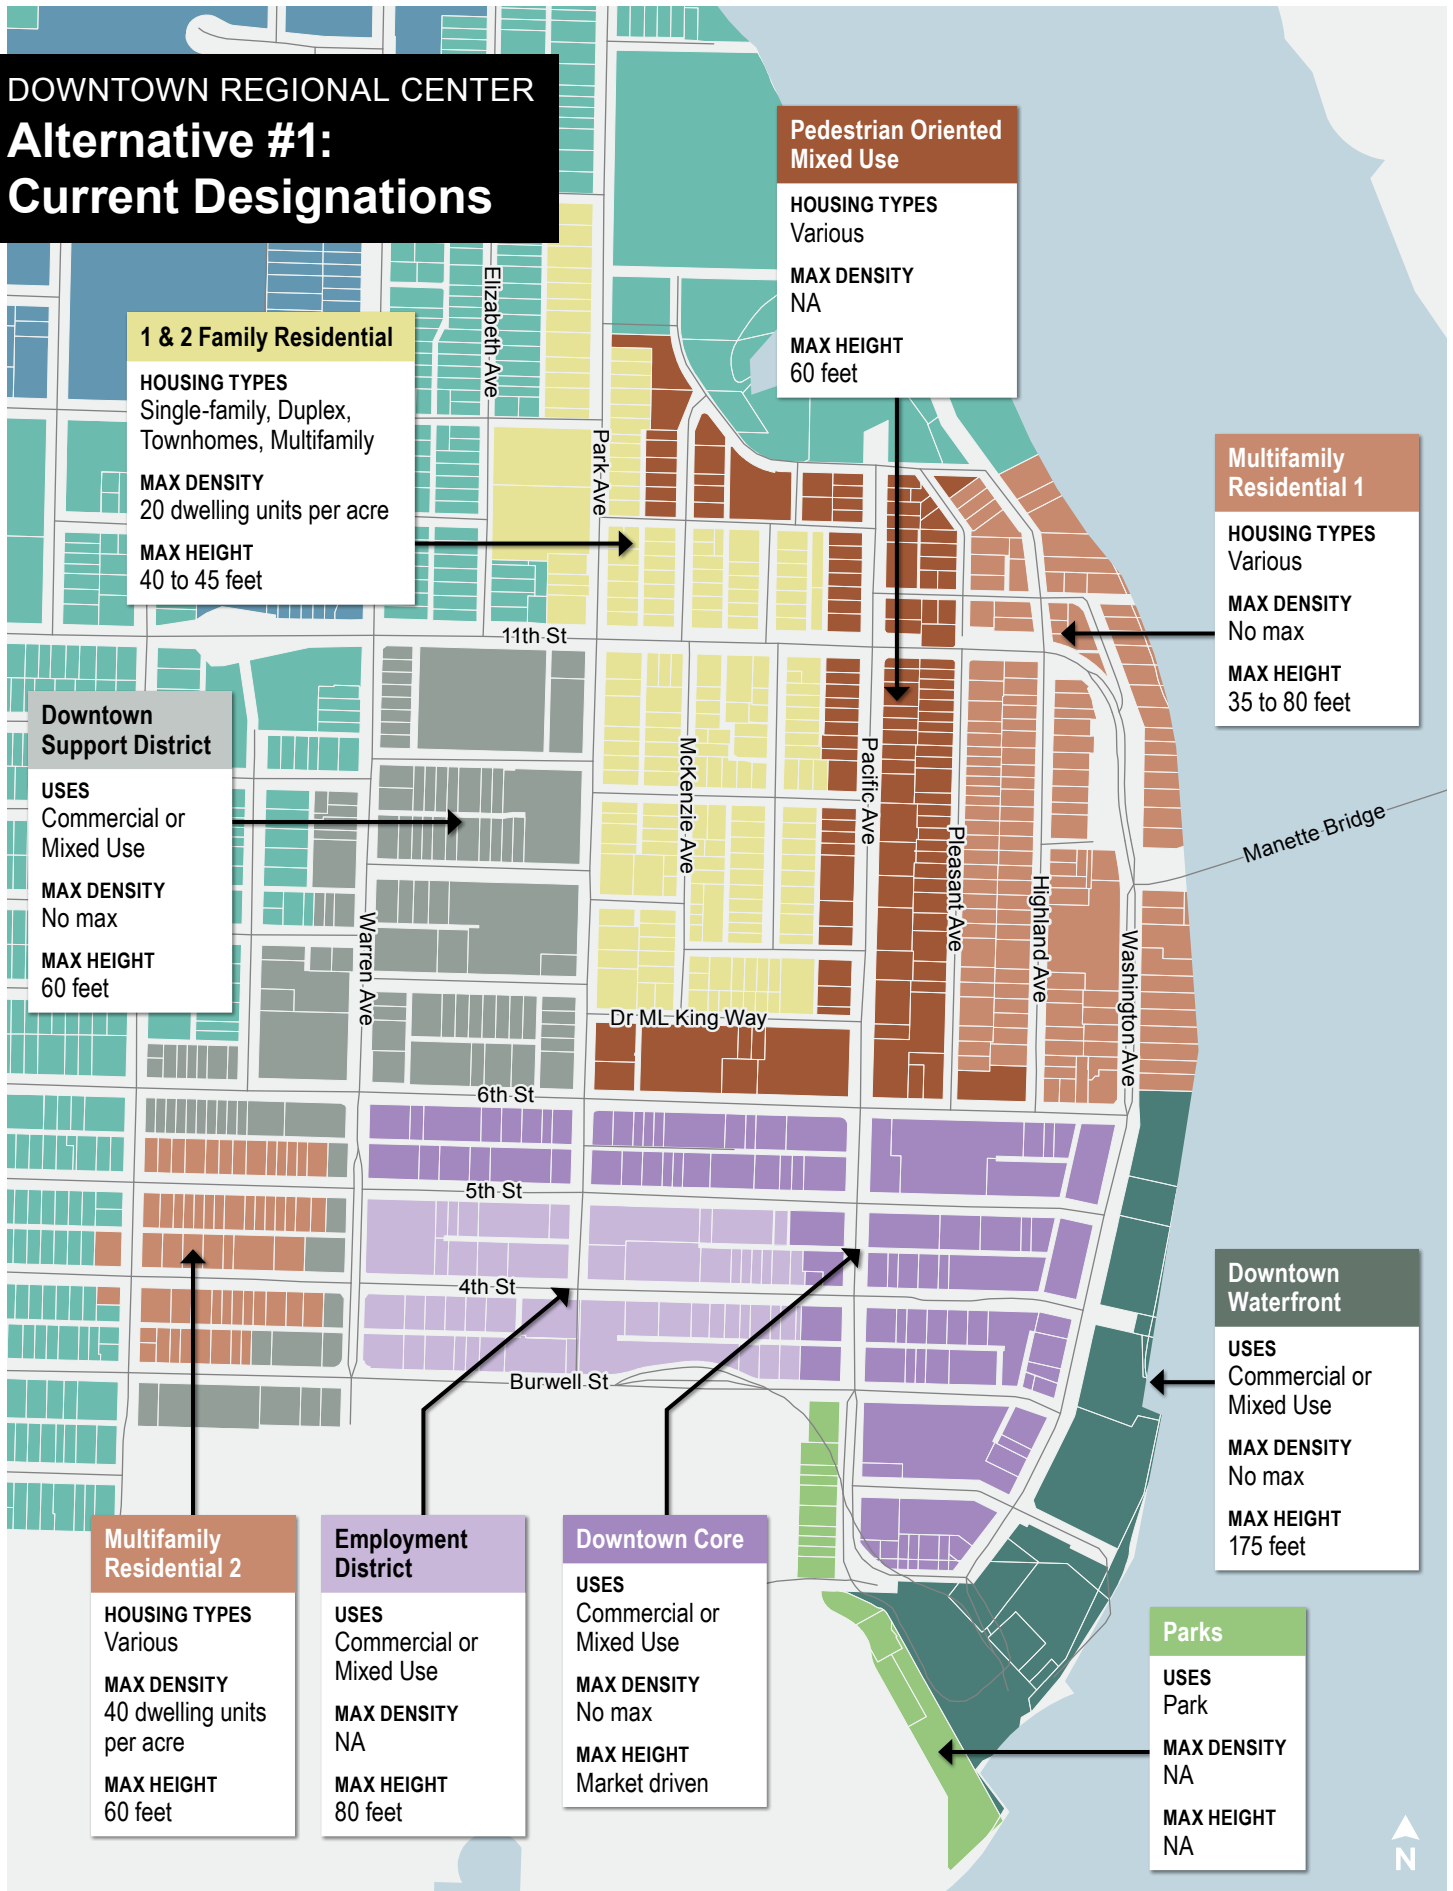

### **DOWNTOWN REGIONAL CENTER (DRC)**

- Consolidate five zones into two mixed-use zones
- The proposed Downtown Mixed-Use Zone would allow mixed uses, increase structure height to 80 feet, apply no maximum density, require redeveloping waterfront properties to extend existing waterfront public promenade trail connection, and require increased street frontage open space.
- The proposed Downtown Neighborhood Business Zone would allow mixed uses, increase structure heights to 45 feet, and apply no maximum density.
