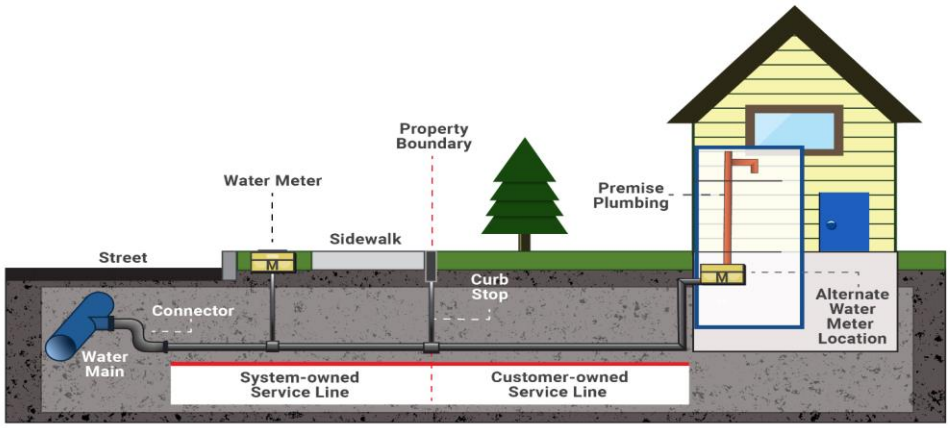
Classifying the Entire Service Line When Ownership Is Split

Purpose of this worksheet *: To summarize EPA's requirements for classifying the entire service line when ownership is split.*

Introduction

In many cases, service line ownership is **split** meaning that the system owns a portion and the customer owns a portion of the service line. Exhibit 1 below is a diagram of a possible division in service line ownership between the water system and customer. While the LCRR requires the inventory to categorize each service line or portions of the service line where ownership is split, a single classification per service line is also needed to support various LCRR requirements, such as lead service line replacement (LSLR), tap sampling, and risk mitigation. Table 1 below indicates how to classify the material for the entire service line when ownership is split between the water system and customer. For more information, see EPA's, ***Guidance for Developing and Maintaining a Service Line Inventory*** (2022)***.***

Exhibit 1. Example of Service Line Ownership Distinction between the Water System and Customer



Source: Exhibit 2-2 of Guidance for Developing and Maintaining a Lead Service Line Inventory (USEPA, 2022).

Table 1: Classification of Entire Service Line When Ownership is Split

System-Owned Portion	Customer-Owned Portion	Classification for Entire Service Line
Lead	Lead	Lead
Lead	Galvanized Requiring Replacement	Lead
Lead	Non-lead	Lead
Lead	Lead Status Unknown	Lead
Non-lead	Lead	Lead
Non-lead and never previously lead	Non-lead, specifically galvanized pipe material	Non-lead
Non-lead	Non-lead, material other than galvanized	Non-lead
Non-lead	Lead Status Unknown	Lead Status Unknown
Non-lead, but system is unable to demonstrate it was not previously Lead	Galvanized Requiring Replacement	Galvanized Requiring Replacement
Lead Status Unknown	Lead	Lead
Lead Status Unknown	Galvanized Requiring Replacement	Galvanized Requiring Replacement
Lead Status Unknown	Non-lead	Lead Status Unknown
Lead Status Unknown	Lead Status Unknown	Lead Status Unknown

Inventory Methodology

PWS Name: Bremerton City of
PWSID: WA5308200

Enter Date Last Updated:	**10/08/24**

Purpose of this worksheet: *For water systems to document the methods and resources they used to develop and update their inventory.*

Part 1: Historical Records Review

Type of Record	Describe the Records Reviewed for Your Inventory and Indicate Your Level of Confidence (*e.g.* , Low, Medium, or High)
1. Previous Materials Evaluation *Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.*	The Federal Lead and Copper Rule (LCR) was promulgated in 1991. Bremerton took two sets of 60 Tier 1 samples for both lead and copper in 1992 and for lead only in 1993 with the following 90th%-ile lead results: 1992 A 14 ug/L, 1992 B 17 ug/L, 1993 12 ug/L. The second set of samples that exceeded the EPA action level of 15 ug/L triggered a requirement for Bremerton to conduct a Corrosion Control Study which was completed in 1995. The recommendation was to install pH adjustment using sodium hydroxide. The Corrosion Control Facility (CCF) went on line in early 1999 and has been fully operational since. Follow-up sampling of Tier 1 sites have verified that the corrosion control has been working and Bremerton is currently on reduced monitoring of 30 homes every three years. Bremerton routinely operates the CCF above the minimum entry point water quality parameter of pH 7.7 SU with an average pH adjustment to about 8.1 SU.
2. Construction Records and Plumbing Codes *Examples: Local ordinance adopting an international plumbing code. Permits for replacing lead service lines.*	Construction records were reviewed to see if lead service lines were ever used in the system as well as interviews with long time staff who have worked on the system for several decades. The search identified that lead goosenecks were still in place in areas close to the downtown core. Most of these have been removed from the system over the years.
3. Water System Records *Examples: Capital improvement plans. Standard operating procedures. Engineering standards.*	All of the records for the capital program, including inspections, as-built records, standards, and operating procedures were reviewed. Relevant information was recorded and used to determine where we needed to focus our efforts to remove lead goosenecks and galvanized service lines which is ongoing.
4. Distribution System Inspections and Records Examples: *Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.*	System records were reviewed and updates made to the GIS system based on these reviews. Tap records, field inspection logs, pre-1980 aerial image maps, capital project records with main and service line replacement were review to provide baseline system information for potential areas to target. Inspection field logs from capital projects and service line taps provided information that generally showed taps/service lines from 1971 to present are plasitc, and from 1950 -1970 new service lines were copper.
5. Additional Records Required by Your State	
6. Other Records	

Part 2: Identifying Service Line Material During Normal Operations

1. During which normal operating activities are you collecting information on service line material? Check all that apply.

- ☑ Water meter reading
- ☑ Water meter repair or replacement
- ☑ Service line repair or replacement
- ☑ Water main repair or replacement
- ☑ Backflow prevention device inspection
- ☐ Other

If "Other", please explain:

2. Did you develop or revise standard operating procedures to collect service line material information during normal operation?	*Yes*

If "Yes", please describe:

SOP was created on 2/1/2017 that provides guidance and instructions for staff to conduct service line material inventories via records review, and field site checks. The SOP was deveoped as a colaborative effort between water system management and staff in Water Resources, Water Distribution, and Engineering and used during daily maintenance activities.

Part 3: Service Line Investigations

1. Identify the service line investigation methods your system used to prepare the inventory (check all that apply). If a water system chooses an investigation method not specified by the state under 40 CFR §141.84(a)(3)(iv), state approval is required. ***Note that investigations are not required by the LCRR but can be used by systems to assess accuracy of historical records and gather information when service line material is unknown.***

- ☑ Visual Inspection at the Meter Pit
- ☐ Customer Self-Identification
- ☐ CCTV Inspection at Curb Box - External
- ☐ CCTV Inspection at Curb Box - Internal
- ☐ Water Quality Sampling - Targeted
- ☐ Water Quality Sampling - Flushed
- ☐ Water Quality sampling - Sequential
- ☑ Water Quality Sampling - Other
- ☑ Mechanical Excavation
- ☑ Vacuum Excavation
- ☐ Predictive Modeling
- ☐ Other

If "Other", please explain:

N/A

2. If "Predictive Modeling", please briefly describe the model and inputs used:

N/A

3. How did you prioritize locations for service line materials investigations? For example, did you consider environmental justice and/or sensitive populations, did you use predictive modeling, and/or did you target areas with high number of unknowns?

We reviewed record drawings, engineering inspections, plan documents, field work/inspection records, and institutional knowledge from staff. It was determined that systems installed after 1950 would not have lead goosenecks and that areas built in 1949 and earlier were target for further investigation and visual inspection at the meter pits in the field. Areas where water mains were replaced had new service lines installed as part of the projects so those areas were removed from the initial effort but have been checked since.

Inventory Summary

PWS Name: Bremerton City of
PWSID: WA5308200

Enter Date Last Updated:	**10/15/24**

Purpose of this worksheet: *For water systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.*

Part 1. General Information

1. Is this the **Initial Inventory** or an **Inventory Update**?	*Initial Inventory*
2a. Who **owns the service lines** in your system? *If other, please explain below.*	*Ownership is split, meaning that the system owns and portion and the customer owns a portion*
2b. Is there documentation that defines service line ownership in your system, such as a local ordinance? *If yes, please describe below and explain where ownership is split (e.g., property line, curb stop).*	*Yes*

The city is responsible for service lines from the water main to the meter per Bremerton Municipal Code 15.02.140 Water System O and M - General

3a. Describe when lead service lines were generally installed in your system.

There are no lead city or customer service lines in Bremerton's system and most of the older customer water services in Bremerton were connected to the water main with copper or galvanized pipe.

3b. When were lead service lines banned in your system? Reference the state or local ordinance that banned the use of lead in your system.

Our records indacte that lead was not used for service lines. Both Seattle and Tacoma used 1939 as the end date of their concern about lead goosenecks and say this is a conservative date. This approach was used by Bremerton.

4. Do you have lead goosenecks, pigtails or connectors in your system?	*Yes*

5. What is your overall level of confidence in the inventory (*i.e.* , "Low", "Medium", or "High.") Please explain your rationale below.

Highly confidant that we have identified service line materials for all city owned services, and most customer locations. A thorough reviews of records and field inspections have identified that only older parts of downtown are likley to have a lead gooseneck and that lead services lines were not used in any portion of the system. Field inspections of customer side materials is ongoing and follows the SOP developed to identify these lines.

Part 2. Inventory Format

Describe your inventory format in the space provided below (*e.g.* , the **Detailed Inventory** worksheet, custom spreadsheet, GIS map). Provide the filename and/or web address if applicable. ***Note that the state may require you to submit your detailed inventory of each service line in your distribution system.***

The detailed inventory has the required information in an Excel spreadsheet format.

Part 3. Inventory Summary Table [1]

If you are using the ***Detailed Inventory*** *worksheet, the classifications you select in the Column "Entire Service Line Material Classification" (Column X) will be used to calculate the total number of service lines for each of the four material classifications below. Otherwise, enter the number of service lines in the aqua-colored cells.* ***Remember this is the classification for the entire service line.***

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead.[2]	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	20,315
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	0

TOTAL	20,315

Notes

[1] This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the **Classifying SLs** worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

[2] A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines unless required by your state.

Public Accessibility Documentation

PWS Name: Bremerton City of
PWSID: WA5308200

Enter Date Last Updated:	**10/16/24**

Purpose of this worksheet: For systems to provide documentation to states on how they met the public accessibility requirements of the LCRR.

1. Select the location identifiers that you use for your service line inventory. Check all that apply.

- ☑ Address
- ☑ Street
- ☐ Block
- ☐ Intersection
- ☐ Landmark
- ☐ GPS Coordinates
- ☐ Other

If "Other", please describe:

2. Does ***every service line*** have a location identifier? *Yes*

If "No", explain. Remember that location identifiers are required for service lines that are lead and galvanized requiring replacement.

3. How are you making your inventory publicly accessible? Check all that apply. *Remember that if your system serves > 50,000 people, you* ***must*** *provide the inventory online.*

- ☐ Interactive online map
- ☐ Static online map
- ☐ Online spreadsheet
- ☐ Printed service line map
- ☐ Printed tabular data
- ☐ Information on water utility mailings or newsletter
- ☐ Hard copy information available in water system office
- ☑ Other

If "Other", please describe:

A search feature for individual addresses is available on the City's website at: https://gis.bremertonwa.gov/apps/lead/search/ The search feature lets the searcher know if they potentially have a lead gooseneck. We don't have any lead service lines and are actively replacing galvanized water service lines. Notification will be sent to customers who have a galvanized service line in accordance with requirements.

State Checklist for Initial Inventory Submittal

PWS Name: Bremerton City of PWSID: WA5308200	
Enter Date Last Updated:	**10/8/2024**

Purpose of this worksheet: *For states to determine and document if water systems met all of the January 15, 2021 Lead and Copper Rule (LCRR) requirements for their* **Initial Inventory** *including timely submission, required elements, use of information sources, public accessibility, and public notification of service line materials.*

Part 1: Person Completing This Checklist	
Name:	Title:
Chance Berthiaume	**Utility Manager (Distribution)**
Telephone:	Email:
(360) 473-5929	chance.berthiaume@ci.bremerton.wa.us

Part 2: Review for Timely Submission	
1. Was the initial inventory submitted by the deadline of October 16, 2024?	*Yes*
Consider post-mark or date sent via email or reported into a state data system.	

Part 3: Review for Required Elements	
1. Does the inventory include ***all*** service lines connected to the distribution system?	*Yes*
Consider if the total number of service lines in the ***Inventory Summary*** *worksheet, Part 3, matches sanitary survey and monitoring data in the state's database (e.g., SDWIS /State) based on population served, number of service connections (including those for non-potable use), number of accounts, census data, or other information.*	
2. Does the inventory include portions owned by the water system and the customer?	*Yes*
Check the service line ownership type selected in the ***Inventory Summary*** *worksheet, Part 1, Question 2a. If the system selected "Ownership is Split" check that their inventory includes information for both the system-owned and customer-owned portions.*	
3. Did the system classify all service lines as either Lead, Galvanized Requiring Replacement (GRR), Non-Lead, or Lead Status Unknown?	*Yes*
Consider if the system completed each row of the inventory summary table in the ***Inventory Summary*** *worksheet, Part 3. Some rows may be zero.*	
4. In the space below, provide additional comments/documentation related to required elements of the system's initial inventory.	

Part 4: Review for Information Sources	
1. Did the system use the following historical records to prepare their initial inventory: previous materials evaluation, construction and plumbing codes/records, water system records, distribution system inspections and records.	*Yes*
Consider if the system identified historical records in each row of the ***Inventory Methods*** *worksheet, Part 1, Rows 1 through 4. Consider if the system completed Row 5 if additional records are required in your state.*	
2. Is the system collecting service line material information during normal operations?	*Yes*
Consider if the system checked one or more normal operations activities in the ***Inventory Methods*** *worksheet, Part 2. Consider asking the systems to submit updated or new standard operating procedures documenting service line material information collection.*	
3. Has the system conducted investigations to verify service line material?	*Yes*

This is not required by the LCRR but recommended by EPA to verify historical records and gather information where records do not exist to reduce the number of unknowns in the system as quickly as possible. Consider:

- *If the system checked one or more of the investigative methods on the* ***Inventory Methods*** *worksheet, Part 3.*
- *If in their inventory, the system indicated that the materials classification was based on investigations.*
- *The number of unknowns - EPA strongly discourages systems from submitting inventories with all unknowns. If all service line materials are lead status unknown, consider asking the water system to conduct investigations.*

4. In the space below, provide additional comments related to information sources used to develop the system's initial inventory.

We reviewed record drawings, engineering inspections, plan documents, field work/inspection records, and institutional knowledge from staff. It was determined that systems installed after 1950 would not have lead goosenecks and that areas built in 1949 and earlier were target for further investigation and visual inspection at the meter pits in the field. Areas where water mains were replaced had new service lines installed as part of

Part 5: Review for Public Accessibility

1. Does the inventory include location identifiers for each service line that is lead or galvanized requiring replacement? — *No*

Consider checking the inventory for location identifiers and reviewing the system's answers in the ***Public Accessibility Doc.*** *worksheet, Questions 1 and 2.*

2. Did the system make its inventory publicly accessible? — *Yes*

Consider reviewing the method by which the water system is making its inventory publicly accessible as identified in the ***Public Accessibility Doc.*** *worksheet, Question 3. Check that systems serving more than 50,000 people have posted their service line inventories online.*

3. In the space below, provide additional comments/documentation related to public accessibility of the system's initial inventory.

Location Information					System-Owned Portion									Customer-Owned Portion								Entire Service Line Material Classification	Other Potential Sources of			Additional Information to Assign Tap Monitoring Tie			Lead Service	
Unique Service Line ID	Location Identifier		Sensitive Population? (Yes/No)	Disadvantaged Neighborhood? (Yes/No)	System-Owned Portion Service Line Material Classification	If Non-Lead in Column G, Was Material Ever Previously	Service Line Installation Date	Service Line Size	Basis of Material Classification	Was the Service Line Material Field Verified?	If "Yes" Service Line Material			Customer-Owned Portion Service Line Material Classification	Service Line Installation Date	Service Line Size	Basis of Material Classification	Was the Service Line Material Field Verified?	If "Yes" Service Line Material Was Field				Is there a Lead Connector?	Is there Lead Solder in the Service Line?	Describe Other Fittings and Equipment Connected to the Service Line that Contain Lead	Building Type Connected to Service Line	Point-of-Entry or Point-of-Use Treatment Present?	Does the Interior Building Plumbing Contain Copper Pipes with Lead	Current LCR Sampling Site?	Date of System-owned LSLR	Date of Customer-owned LSLR
	Street Address	Other Location Identifier									Describe the Field Verification Method	Enter the Date of Field Verification	Notes						Describe the Field Verification Method	Enter the Date of Field Verification	Notes											
A Unique ID is recommended for each service line.	*Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.*		*Select Yes if sensitive subpopulation, e.g., day care, school, multifamily home. If Yes-Other, describe in the Notes field.*	*Does location meet state affordability guidelines or other measures?*	*Dropdown list includes recommended subclassifications. If "Non-Lead Other", describe in Notes field*	*Select Yes, No, or Don't know. Important for determining if downstream/ customer-owned galvanized service line requires replacement*	*Date, year, or estimated date range when the service line was installed or replaced*	*Diameter in inches*	*Select option from drop down list. If "Other," describe in the Notes field*	*Select Yes or No*	*Select option from drop down list. If "Other," describe in the Notes field*	*Enter approximate date of field verification or date that the record was updated*	*Can use this field for documenting additional relevant information, including when classification changes.*	*Dropdown list includes recommended subclassifications. If non-lead other, describe in Notes field.*	*Date, year, or estimate date range when the service line was installed or replaced*	*Diameter in inches*	*Select option from drop down list. If "Other," describe in the Notes field*	*Select Yes or No*	*Select option from drop down list. If "Other," describe in the Notes field*	*Enter approximate date of field verification or date that record was updated*	*Can use this field for documenting additional relevant information, including when classification changes.*	*Dropdown list includes four required service line classifications of Lead, Non-lead, Galvanized Requiring Replacement, or Unknown*	*For example, lead gooseneck or pigtail where the water main is connected to the service line*	*Select Yes, No, or Don't Know*	*For example, backflow preventer or meter containing lead*	*Note: This information may be helpful for identifying lead tap monitoring locations.*
